La Programmazione degli acquisti e dei lavori pubblici

TIPOLOGIE DI PROCEDIMENTO PAESAGGISTICO

Twitter will change its logo

Elon Musk owns Twitter. Musk wants to change Twitter's logo.

The logo of Twitter is a blue bird. Almost everyone knows it. But Musk says that it is time to change the logo. The new logo will be an X. When Musk buys Twitter, it changes to X Corp. Musk wants it to be as good as China's WeChat app. Musk thinks that the logo should change earlier.

There are problems with Twitter recently. Some users do not like it when Twitter says that they can only read a certain number of tweets per day. Some users stop using Twitter because of it. Twitter is also having trouble with its ex-employees. They want money because Twitter ends their contracts.

Il subappalto nei contratti pubblici

LE DETERMINAZIONI

La Tomatina

La Tomatina is a festival. It takes place in Buñol. Buñol is a town in Eastern Spain. This area is known for farms of tomatoes.

In 1945, children in Buñol have a food fight in the street. Then La Tomatina starts. People have a big tomato fight every year. The festival becomes very popular in the 1980s. People from all the world come to see it.

Last week, about 20,000 people are in La Tomatina. They throw 130 tons of tomatoes at each other. Some people wear goggles. Goggles keep their eyes safe.

When the fight ends, all the people are red from the tomatoes. The streets are red, too.

Scientists make nuclear fusion

Nuclear fusion happens in every star. It gives the star energy. Nuclear fusion means that two atoms come together. They make one heavy atom. This one atom makes a lot of energy.

Scientists try to make nuclear fusion for a long time. The research takes many years. The correct technology is hard to have.

Last week, American scientists make nuclear fusion for the first time. They use 192 lasers for it. They make more energy than the fusion needs. Some people say that the event is the most important moment of the 21st century.

Nuclear fusion can make enough energy for all people. It will be clean energy. Still, the work will take many years before companies can use nuclear fusion.

 DINIEGO

More expensive beer

Carlsberg is a Danish company. It makes beer. It is the third biggest brewer in the world.

Carlsberg says that its beer will cost more. The prices of ingredients cost more. Transportation costs more. Transportation is when you move things to other places.

Many things cost more after COVID-19. It is because companies cannot make enough materials. Materials are the things you use to make other things. Many businesses are open again.

Some people may drink less beer. Carlsberg plans to sell more of its other drinks. These drinks are ciders, mineral water, and alcohol-free beer.

Three men jump out of a plane

People in the US celebrate Veterans Day on November 11. They remember all the men and women who work in the military.

Fred Lake is 88 years old. He is a veteran. A veteran means that a person works in the military in the past. His son and grandson are veterans, too. Fred has a dream. He wants to jump out of a plane. He speaks to his son about it for many years. His son does not agree.

Then Fred watches a story on TV. The story is about grandmothers. They jump out of a plane. An organization helps them. This organization helps old people who have little money. The organization fulfills their dreams.

The organization helps Fred. Fred, his son, and grandson jump out of a plane on Veterans Day. They spend only a few minutes in the sky. Happily, they will remember the day forever.

Technology Helps Archaeologists

Archaeologists study old things. Archaeologists help us understand history. They dig in the ground. They discover old things and towns. However, the work is not easy. Modern buildings make it sometimes impossible to dig in the ground.

Now, new technology exists. It is a special radar. The radar scans the ground. It sends pictures to a computer. Archaeologists can see what is under the ground. This technology is great. Scientists can discover more places.

Scientists study an old town of Falerii Novi. The town is near Rome in Italy. The first people live in Falerii Novi in 241 BC. The radar searches the town. Scientists discover baths, a market, and also a system of water pipes.

PROCEDIMENTO PAESAGGISTICO

Dead singers sing again

Modern technologies can make dead singers sing again. Their holograms can sing old hits and new songs, too.

The first performance of a hologram happens in 2012. People can see Tupac Shakur at a music festival. Tupac dies in 1996. Some people don't like his hologram. They say that it is scary.

Other artists sing after they die. They are, for example, Frank Zappa or Amy Winehouse.

Some people think that the technology makes the artists seem alive. Other people think that this is only a way to make money.

Pop star Selena Quintanilla dies in 1995. Her family makes 24 albums with her songs since 1995. Her voice is different on the newest album. Modern technologies make her sound older.

PROCEDIMENTO SUAP

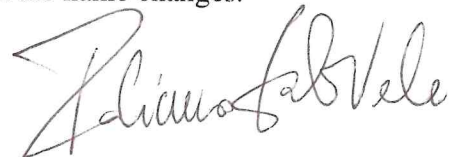

Facebook changes name

The company Facebook changes its name. The new name will be Meta. The company wants to build the Metaverse. The Metaverse is a place in virtual reality. A computer makes it. People can meet there.

Facebook's CEO Mark Zuckerberg says that the main idea is still the same. The idea is to bring people together but in virtual reality.

Recently, Facebook has many problems. Secret documents say that some Facebook users have problems with their mind. The company also deletes some things. Users are angry.

Some people say that Facebook changes its name because of these problems. Some people do not like Facebook anymore. Facebook can change again when the name changes.

South Koreans Start to Like Cheese

This news is about cheese. In Asia, Japan is the biggest consumer of cheese. South Koreans are starting to like cheese, too. They buy more and more of it.

They are starting to like Western dishes. They like pizza, for example. They also put cheese into traditional Korean dishes.

Every South Korean eats around 2.4 kilograms of cheese. A Frenchman eats 10 times more.

A robot makes fries

In California, US, company Miso Robotics makes a special robot. The robot helps in restaurants.

The robot has arms. Robots in car factories have similar arms. At first, the robot only turns burgers. Workers think that the robot can do other things, too.

Now, the robot makes french fries, fried onions, and other meals. A computer controls the robot.

The robot works faster than people. It can do more tasks at the same time. The robot knows exactly when the food is ready.

The robot does tasks which nobody wants to do. Workers are happy that somebody does this demanding work. The work is easier for them at night.
